Geric Morit

FULL-STACK DEVELOPER

Philippines, Taguig | 09157513981 | gericmorit.dev@gmail.com

Portfolio: https://www.gericandmorty.codes

GitHub: https://github.com/gericandmorty

Objective

Detail-oriented full-stack developer aiming to contribute strong experience in backend and frontend development, API design, and database management to deliver high-quality, scalable software solutions.

Experience

Full-Stack Developer (Intern and Employee) – Inspire Holdings Inc. **February – July 2026**

- Led a development team in building full-stack web and mobile applications using Next.js, NestJS, .NET Framework, and Expo Go (React Native).
- Mentored team members and established consistent development standards and best practices.
- Designed and managed scalable database structures to optimize performance and data integrity.
- Oversaw project progress, code quality, and team collaboration to deliver reliable, maintainable software solutions.

Project Leader (Student) **2022-2026**

- Led multiple academic projects, overseeing both frontend and backend development across teams
- Developed full-stack applications using React, Laravel, Django, and FastAPI
- Designed and implemented RESTful APIs and handled backend logic for scalable systems
- Built and managed databases, ensuring efficient data modeling and performance optimization
- Coordinated team tasks, timelines, and deliverables to ensure successful project completion
- Mentored team members and reviewed code to maintain quality and best practices
